## The IQ plus® 2100... Unmatched Features and Value.

The 2100 is ideal for use in general purpose weighing, portioning, and a variety of food processing applications. Stainless steel buttons repel messy ingredient spills and damage by knife point, while the NEMA 4X stainless steel indicator enclosure stands up to frequent washdown. Standard overload stops protect the base during heavy use.

All operations are controlled through two buttons—zero and units. Push-button zero and a full range of units, including lb/oz, offer the flexibility needed for a wide variety of applications.

Offering the unique capability to read lb and oz simultaneously, the 2100 lends itself to portioning and ingredient weighing. The two-button keypad and vibrant display that is visible from all angles make operation so easy that users are sure to lock in the most accurate weighments.
